

Noon Sakinah — Iqlab (Conversion)

■ This is a study companion for your Tajweed course. Each bullet point is a key concept from the video lecture. Review these pointers before or after each lesson.

What is Iqlab?

- Iqlab (■■■■■■■■■■) = the Noon is CONVERTED into a hidden Meem sound
- Occurs when Noon Sakinah/Tanween is followed by ONE letter only: Ba (■)
- Iqlab is the EASIEST rule — only one trigger letter
- The Noon completely changes its nature and becomes Meem-like

Why Iqlab Happens — The Logic

- Noon (■) is articulated by the tongue tip (front of mouth)
- Ba (■) is articulated by the two lips (front of mouth too)
- Going from tongue-tip Noon to lip Ba is awkward and unnatural
- Arabic naturally converts the Noon to Meem (also a lip letter)
- This creates smooth, natural flow: lip sound into lip sound
- This is Arabic's natural harmony — ease of pronunciation (tayseer)

How to Perform Iqlab

- Step 1: See Noon Sakinah (■■) or Tanween followed by Ba (■)
- Step 2: DO NOT say the Noon as a normal 'n' sound
- Step 3: Close your lips as if you're about to say Meem
- Step 4: Hold the nasal (Ghunnah) resonance for 2 beats
- Step 5: Release naturally into the Ba
- Result: mim-ba... (not nin-ba or n-ba)

Quranic Examples — Iqlab

- ■■■■ ■■■■■■ — NOT: min ba'di — YES: mim-ba'di (lips close + hold nasal)
- ■■■■■■■■■■ — NOT: anbiyaa' — YES: ambiyaa' (hidden Meem before Ba)
- ■■■■ ■■■■■■ ■■■ — same rule every time ■■ meets ■
- ■■■■■■■■ ■■■■■■■■ — NOT: 'aleemun bi — YES: 'aleemu■ bi (tanween converts)
- ■■■■■■■■ ■■■■■■■■ — NOT: samee'un baseer — YES: samee'u■-baseer

How to Recognize Iqlab in the Mushaf

- A small Meem (■) is written above the Noon or Tanween
- This is your visual cue — it literally marks where Iqlab applies
- The small ■ reminds you: convert to Meem + add Ghunnah
- Look for this sign in your Quran — it makes Iqlab impossible to miss

Quick Reference — Iqlab

- TRIGGER: ■■ or tanween followed by Ba (■) only
- ACTION: Convert Noon to hidden Meem + hold Ghunnah 2 beats
- SOUND: Lips close gently + nasal resonance then release into Ba
- VISUAL CUE IN MUSHAF: Small ■ written above the Noon
- FREQUENCY: Less frequent than Izhar/Ikhfa but clearly visible
- MISTAKE TO AVOID: Saying 'n' before the Ba — it should be 'm' sound
