

RULE: Parsing (■■■■■■■■) = identifying every word's grammatical role and case ending.

The 3 Grammatical Cases

Case	Arabic Name	Vowel	When Used
Nominative	مُرَبَّعَاتٌ	■ damma	Subject, predicate of nominal sentence
Accusative	مُرَبَّعَاتٌ	■ fatha	Object, predicate of مُرَبَّعَاتٌ/مُرَبَّعَاتٌ, haal, tamyeez
Genitive	مُرَبَّعَاتٌ	■ kasra	After prepositions, 2nd noun of idafa
Jussive	مُرَبَّعَاتٌ	sukoon	Verb after مُرَبَّعَاتٌ مُرَبَّعَاتٌ conditional

Parsing a Sentence Step by Step

Example: ■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■

Word	Analysis	Case/Form
████████	██████ ██████ (past tense verb)	no case (verb)
██████████████	██████ ██████████ (subject, doer)	damma = nominative
██████	██████ █████ (preposition)	no case (particle)
██████████████████	██████ ██████████ (after preposition)	kasra = genitive

- ★ Parsing is the highest skill in Classical Arabic — Quranic scholars parsed every verse
- ★ Every word in the Quran has been parsed and documented by scholars over 1400 years
- ★ Start by parsing: subject (■ ■ ■ ■ ■ ■ ■ ■), object (■ ■ ■ ■ ■ ■ ■ ■), after preposition (■ ■ ■ ■ ■ ■ ■ ■)
