

Madd — Elongation Rules

■ This is a study companion for your Tajweed course. Each bullet point is a key concept from the video lecture. Review these pointers before or after each lesson.

What is Madd?

- Madd (■■■■) = stretching/elongating a long vowel sound
- The 3 long vowel letters: Alif (■ after Fatha) | Waw (■ after Damma) | Ya (■ after Kasra)
- Without Madd: Quran is rushed and unclear; With Madd: beautiful, flowing, correct
- Madd is measured in 'beats' (■■■■■■■■) — one beat = time to say one short vowel
- Different situations require different lengths: 2, 4, 5, or 6 beats

Type 1: Natural Madd (■■■■■■ ■■■■■■■■■■■■■■)

- Length: 2 beats — the default, minimum length for all long vowels
- Condition: Just the long vowel — nothing special following it
- No Hamza or Sukoon after the long vowel letter
- Examples: ■■■■■■ (qaala) — 2 beats on the Alif
- Examples: ■■■■■■ (nooh) — 2 beats on the Waw
- Examples: ■■■■■■ (deen) — 2 beats on the Ya
- This is the foundation — all other Madds are extended from this base

Type 2: Connected Madd (■■■■■■ ■■■■■■■■■■■■)

- Length: 4-5 beats (obligatory)
- Condition: Long vowel + Hamza (■) in the SAME word
- The long vowel must immediately precede the Hamza
- Examples: ■■■■■■■■■■ (as-samaa-i) — stretch Alif 4-5 beats before Hamza
- Examples: ■■■■■■ (jaa-a) — Alif before Hamza = 4-5 beats
- Examples: ■■■■■■ (soo-un) — Waw before Hamza = 4-5 beats
- Why extended? The Hamza after a long vowel creates natural emphasis

Type 3: Separated Madd (■■■■■■ ■■■■■■■■■■■■)

- Length: 4-5 beats (permissible — scholars differ)
- Condition: Long vowel at END of one word + Hamza at START of next word
- Examples: ■■■■■■ ■■■■■■■■■■■■ (innaa anzalnaahu) — Alif + Hamza across words
- Examples: ■■■ ■■■■■■■■■■■■ — long Ya + Hamza in next word
- Some reciters read 4 beats, others 5 — both are correct
- Less obligatory than Muttasil but commonly elongated in Hafs narration

Type 4: Necessary Madd (■■■■■■■ ■■■■■■■■■■)

- Length: 6 beats — the LONGEST Madd, absolutely obligatory
- Condition: Long vowel + PERMANENT sukoon (original letter with sukoon)
- This includes letters with Shadda at end of words (stopping there)
- Examples: ■■■■■■ (ad-daallleen) — long Alif before Shadda-Laam = 6 beats
- Examples: ■■■■■ (the Alif stretches 6 beats)
- Also: the individual letters at surah openings: ■■■■ ■■■ ■■ — each letter = 6 beats
- In the mushaf: marked with a special curved symbol above the vowel letter

Type 5: Temporary Madd (■■■■■■■ ■■■■■■■■)

- Length: 2, 4, or 6 beats — flexible
- Condition: Long vowel at end of word when you STOP on that word
- The sukoon is 'temporary' — only exists because you stopped
- Examples: Stopping on ■■■■■■■■■■■■ — the long Ya gets Madd Aaridh
- Examples: Stopping on ■■■■■■■■■■ — the long Ya gets elongated
- All three lengths (2/4/6) are valid — reciter's choice
- IMPORTANT: Only when actually stopping — continuing reading: Natural Madd only

Quick Reference — Madd Summary Table

- NATURAL (■■■■■■■■■■■): Long vowel + nothing special = 2 beats
- MUTTASIL (■■■■■■■■■): Long vowel + Hamza IN SAME word = 4-5 beats
- MUNFASIL (■■■■■■■■■): Long vowel at word end + Hamza next word = 4-5 beats
- LAAZIM (■■■■■■■■■): Long vowel + permanent sukoon = 6 beats (obligatory)
- AARIDH (■■■■■■■■■): Long vowel at word end when stopping = 2 or 4 or 6 beats
- RULE OF THUMB: When in doubt, 2 beats is always correct for Natural Madd
- Most important to master: Laazim (6 beats) and Muttasil (4-5 beats)
